

FROM YOUR FIRST STEP TO YOUR WORKOUT

From your consultation to learning the basics and training with a focus on your goals.

BEGINNERS ARE WELCOME

HOW WE WORK TOGETHER

01 Consultation

20 MINUTES

Tell me what you would like to achieve. I will explain how we will work together and answer your questions.

02 Initial assessment

OBSERVING YOUR MOVEMENT

I observe how you move and assess your starting point. This helps me adapt the training plan to your needs.

04 Your ongoing training

FOCUSING ON YOUR GOALS

Building on the basics, we focus more closely on your goals. I adjust the exercises and intensity as you progress.

03 Your first 4 sessions

LEARNING THE BASICS

We learn foam rolling (SMR), warm-up routines, basic movement patterns and how to use cardio machines.

That is our journey. Next, see how an individual session is structured.

INSIDE A TRAINING SESSION

FOUR PARTS OF YOUR WORKOUT

Every stage has a purpose. I adapt the exercises and intensity to your goals and current fitness level.

01

Warm-up

We ease into movement and gradually prepare your body for the workout ahead.

02

Movement & technique

We work on movement quality and correct exercise technique, with your individual needs in mind.

03

Goal-focused training

We focus on exercises that support your goals. You can also try a variety of equipment and exercises if you would like to.

04

Cardio

We finish with a gentler cardio phase to wind down from the workout and help build endurance.

AT YOUR OWN PACE

No previous training experience is needed. **Two sessions a week** can be a good starting point; we adapt the schedule and training plan to your lifestyle and what you can manage.

LET'S START WITH A CONVERSATION

Tell me your goals, and we will plan the next step together.
